

Johan Van Hoof, M.D.
Global Therapeutic Area Head, IDV Vaccines

Johan Van Hoof, M.D., is the Global Therapeutic Area Head, IDV Vaccines, Janssen R&D and Managing Director, Janssen Vaccines & Prevention, B.V. He is a member of the Senior R&D Leadership Team, leading Research & Development at Janssen Vaccines, drawing on his extensive experience with Johnson & Johnson and the broader vaccine industry.

He joined the Johnson & Johnson Family of Companies in April 2005 as Vice President, Data Management and Early Clinical Development. Following roles as Chief Operating Officer (COO) of Johnson & Johnson Pharmaceutical Research, LLC, and Head of the Global Development Organization, Johan was appointed Global Therapeutic Area Head for Infectious Diseases & Vaccines in 2010.

Since 2011, he has been overseeing research & development at Janssen Vaccines as Managing Director. In this role, Johan is tirelessly leading his world-class team to develop transformational vaccines which will prevent, intercept, treat and cure life-threatening infectious diseases. Johan continues to advance Janssen's efforts in this area, utilizing cutting-edge technology and strategic collaborations to drive research and development forward.

Prior to joining the Johnson & Johnson Family of Companies, Johan acquired more than 20 years of experience in the vaccine industry, having worked with Pasteur Mérieux Connaught, Chiron Vaccines and GlaxoSmithKline (GSK) Biologicals. During this period, he held leadership roles with increasing responsibilities, including Head, New Product Development at GSK Biologicals.

Johan received his medical degree (cum laude) from the University of Antwerp, Belgium, in the Department of Anatomy and Embryology at Rijksuniversitair Centrum Antwerpen, Belgium. He studied business management at Krauthammer International School and the International Executive Programme INSEAD, Fontainebleau, France.
